

Benefits of the adjustable table on productivity and well-being

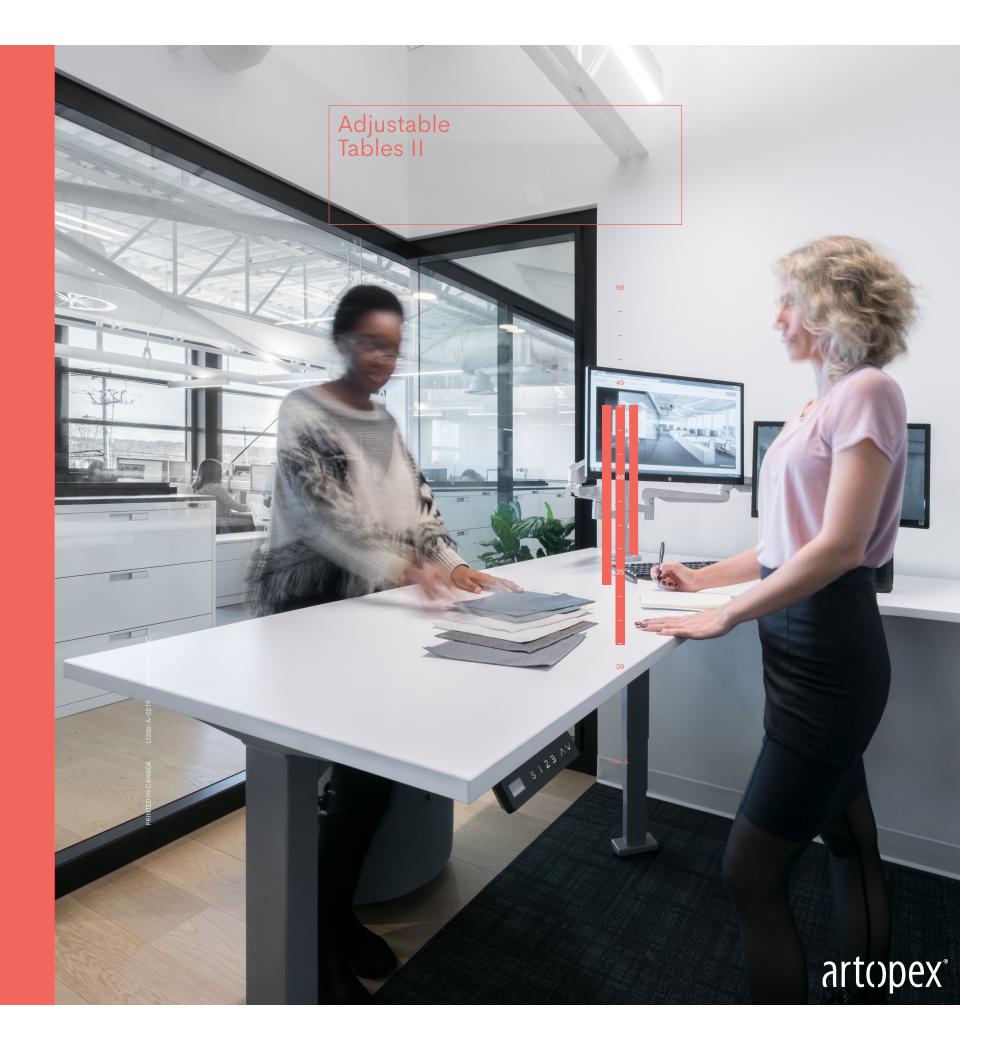

Increases energy
Varying positions throughout the day naturally increases energy
levels. Some studies also demonstrate positive effects on mood.

Stimulates concentration and productivity
Working in the standing position keeps you alert and improves concentration, helping to maintain and even increase productivity.

Improves posture

Working in the correct standing position helps to improve posture which can reduce muscular and skeletal system problems.

Good for the heart
Several studies show the positive impact of varying positions on different health issues such as cholesterol, type 2 diabetes and
