

Genius
Training tables

LAZER EDGE

artopex®

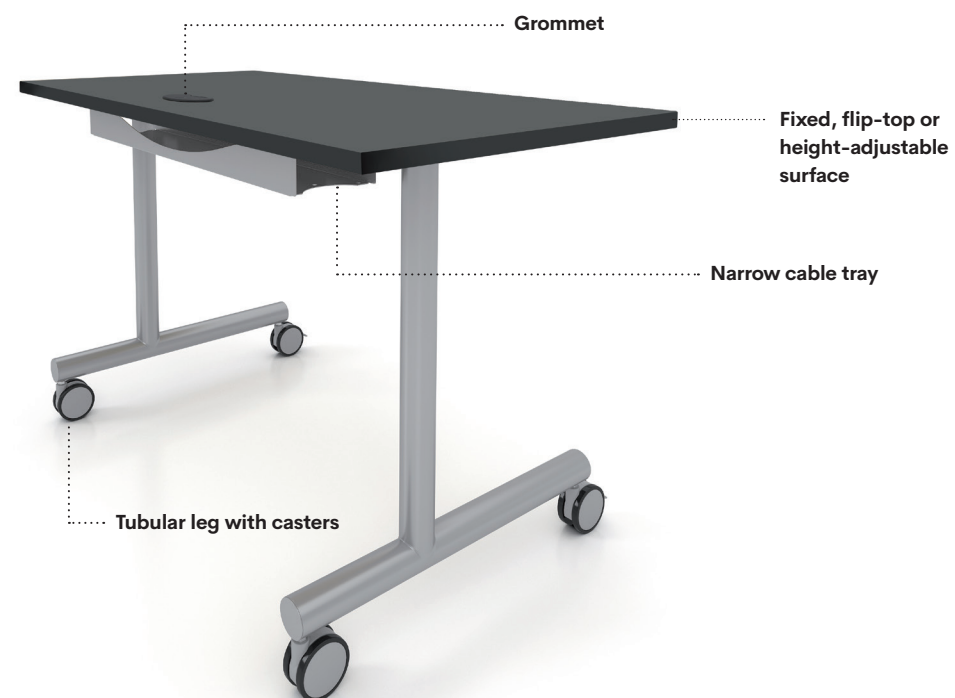

Colorful

Visible metal components (legs, finishing caps, cable trays and metal doors) are available in all Artopex enamel finishes.

The Genius table collection is truly multi-purpose. They are available with fixed, flip-top or height-adjustable surfaces. Whether for training, conferences, business meetings or brainstorming sessions, Genius can be reconfigured in no time at all. The tables are designed to be nested vertically with ease and for wire management as needed.

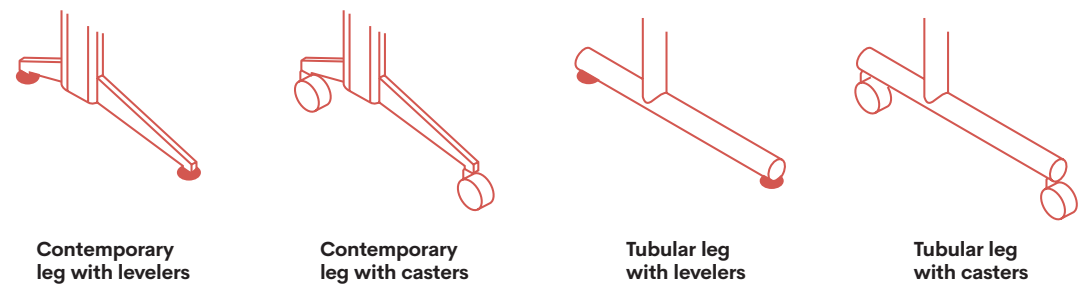

Efficient Space Management

In storage position, flip-top tables occupy a minimum of space due to the unique interlocking leg system.

Legs and Footings

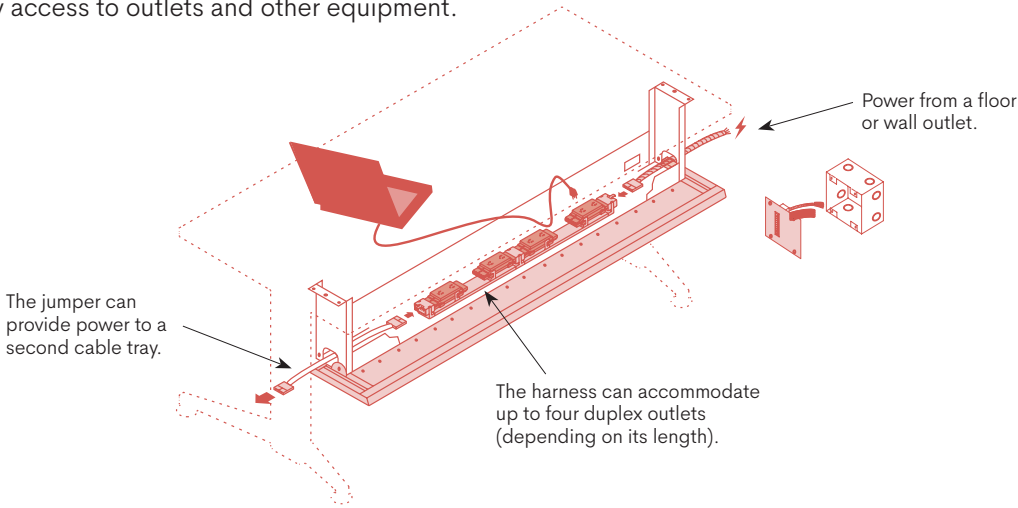

Two distinctly different leg styles are available on the Genius table with either levelers or casters. Flip-top tables are always equipped with casters for easy storage.

Power management

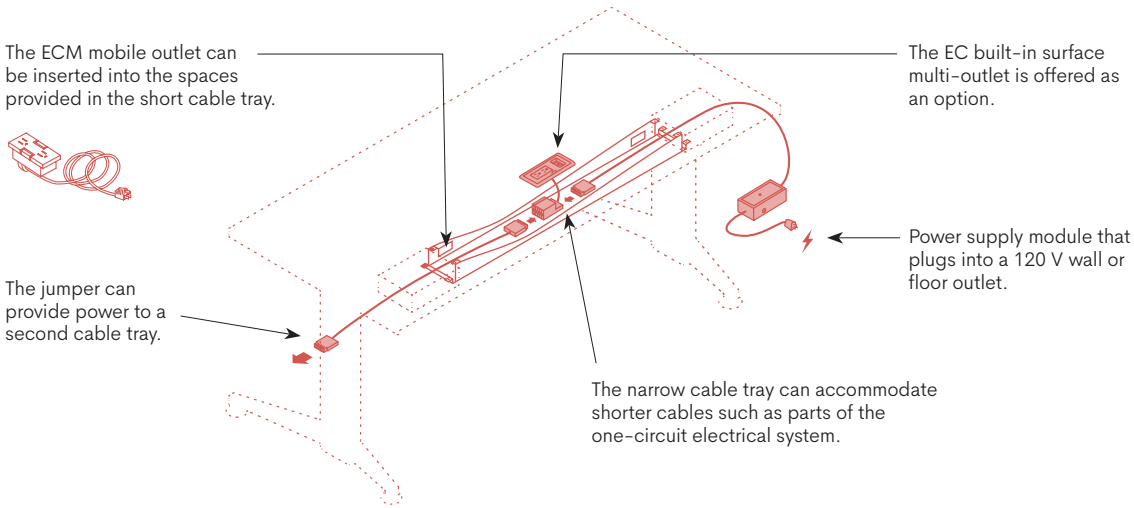

Full length cable tray

- Allows for efficient wire management including the four-circuit electrical system.
- Can be fitted with a flip access panel that also serves as a modesty panel.
- Easy access to outlets and other equipment.

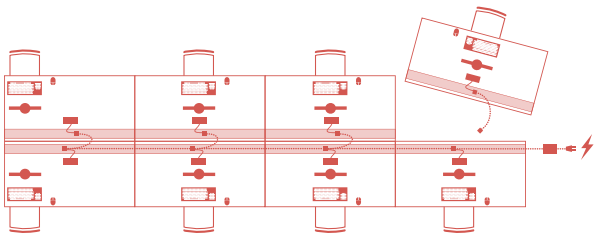

Narrow cable tray

- Specific to flip-top surfaces.
- Can also be attached under any work surfaces, in any position.
- Can accommodate various types of cabling except the four-circuit electrical system.

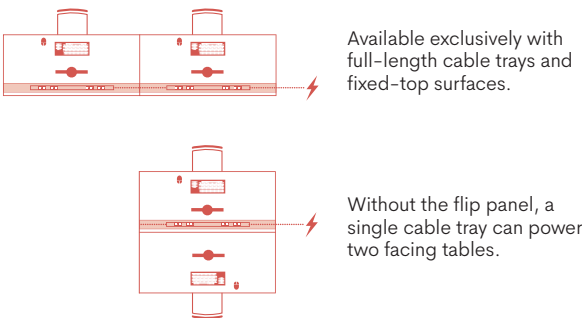

One-circuit electrical system

Can power up to eight tables on the same circuit.

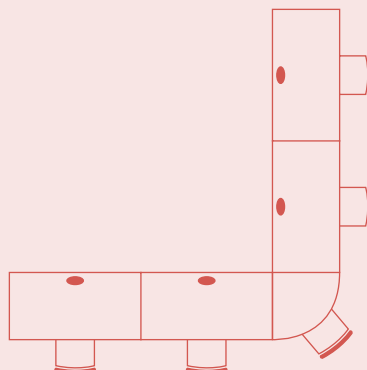

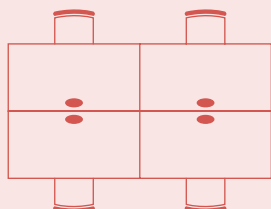

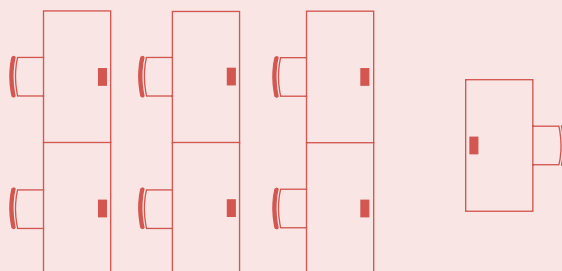

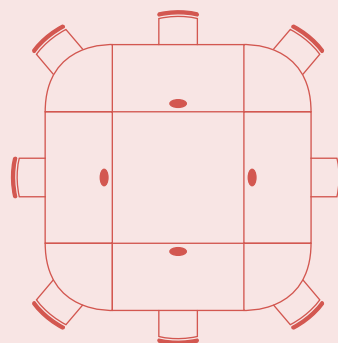

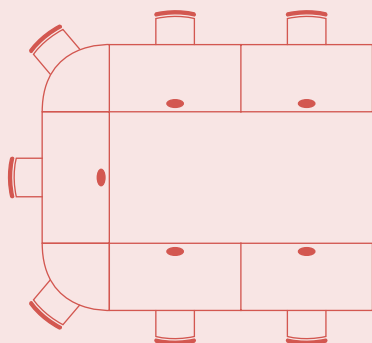

Four-circuit electrical system

Recommended for permanent installations.
